

Cornell University Graduate and Professional Student Assembly

Agenda of the March 6, 2023 Meeting

5 PM – 6:30 PM

Physical Sciences Building Room 401 or via [Zoom](#)

- I. Call to Order
- II. Roll Call
- III. Late Additions to the Agenda
- IV. Approval of the February 20th Minutes
- V. Presentations
 1. Big Red Barn Director Jennifer Forbes
 2. Ryan Feathers and Trevor Cross
- VI. Introduce the Business of the Day
- VII. Breakout Session by Division
- VIII. Business of the Day
 1. Resolution 7: Dependable and Inclusive Supply of Pharmaceutical and Essential Non-Prescription Supplies
- IX. Reports of Officers and Committee Updates
 - a. Executive Committee
 - b. Operations
 - c. Appropriations
 - d. Communications
 - e. Finance
 - f. Student Advocacy
 - g. Diversity and International Students
 - h. Programming
 - i. Faculty Awards
 - j. General Committee
 - k. Graduate School
- X. Open Forum
- XI. Adjournment

If you are in need of special accommodations in order to fully participate, please contact Student Disability Services at (607) 254-4545 or the Office of the Assemblies at (607) 255-3715 or assembly@cornell.edu prior to the meeting.

Graduate and Professional
Student Assembly

Cornell Graduate and Professional Student University Assembly

Minutes of the February 20, 2023 Meeting

5:00 PM – 6:30 PM

401 Physical Sciences Building

- I. Call to Order
 - a. Chair K. Carter Cram called the meeting to order at 5:00pm
 - b. *Members Present:* D. Browne, A. Bruce, S. Carrillo, K. Chapman, Y. Cho, K. Carter Cram, B. Hayes, M. Heeney, Y. Kang, A. Majumdar, M. Matthews, M. Minelli, O. Perkins, K. Rajagopalan, G. Smits, J. Washington, A. Wunsch, R. Yuan.
 - c. *Also Present:* K. Boor, A. Breitstein, A. Kapoor, E. Kalweit J. Malina, M. Pollack, J. Withers.
- II. Late Additions to the Agenda
 - a. There were no late additions to the agenda.
- III. Approval of the February 6th Meeting minutes.
 - a. The minutes were **approved** unanimously with notes for an amendment.
- IV. Presentation
 - a. President Martha Pollack and Dean of the Graduate School Katherine Boor
 - i. M. Pollack introduced updates and announcements over the past semester, congratulating and highlighting some noteworthy accolades and achievements by graduate and professional students.
 - ii. M. Pollack noted leadership updates around campus, including the new Vice President of Research and University-Wide Chief Global Information Technology Officer.
 - iii. M. Pollack noted initiatives to uplift graduate students such as increases of stipends and changes to parking systems. M. Pollack noted the impact of staff shortages on TCAT services despite continual profits and hope of improvements to come.
 - iv. M. Pollack acknowledged the graduate student rally for a student union that had previously occurred.

Cornell University
Graduate and Professional
Student Assembly

- v. M. Pollack emphasized resources for mental health and well-being and noted the Cornell Mental Health Report that can be accessed for further details.
- vi. M. Pollack acknowledged continuing global issues and shared her hopes that students will continually reach out and support one another.
- vii. M. Pollack read a question on the possibility of further non-gendered ADA compliant bathrooms.
 - 1. M. Pollack stated that this was a Cornell priority and that money has been allocated towards this project.
- viii. M. Pollack read a question on the difficulty of obtaining a P-Card.
 - 1. M. Matthews stated that there is often difficulty when attending conferences of having to pay out of pocket to later receive reimbursement.
 - 2. D. Boor stated that there is no clear and current solution or system to address these reimbursements due to the large overhead of overseeing many P-cards.
- ix. M. Pollack read a question on lights at Cornell.
 - 1. M. Pollack stated that, should any lights have been noted as out, a service request has already been submitted. M. Pollack noted that a new project has begun to implement a new and standardized lighting system for the Arts Quad. M. Pollack stated that lighting for the Slope is being focused on popular walking paths.
- x. M. Pollack read a question on the possibility of free designated graduate and professional student parking spots for Cornell Health.
 - 1. M. Pollack stated that due to the limited number of paid parking spots, spots cannot be allotted specifically for one group of people.
- xi. M. Pollack read a question on the possibility of increasing the hours for Cornell Health.

Cornell University
Graduate and Professional
Student Assembly

1. M. Pollack stated that due to limited monetary resources, it would be difficult to allocate resources to this, but it could be possible.
- xii. M. Pollack read a question on why there aren't comprehensive winter maintenance programs.
 1. M. Pollack stated that efforts are focused on priority areas because it would be too impossible to clear all of campus.
 2. J. Washington questioned how priority areas are determined.
 3. M. Pollack stated that Facilities makes these decisions based on their best judgement, but that if there are any concerns they can be noted. M. Pollack noted the idea of QR codes scattered throughout campus to be interacted with.
- xiii. M. Pollack read a question on the possibility of designated hours for graduate and professional students at the gym.
 1. M. Pollack stated that with limited space, gyms are encouraged for use by all at Cornell.
 2. J. Washington questioned if gyms could be open for 24-hours and students could swipe in without staff.
 3. M. Pollack stated that she would investigate this possibility, but that insurance policies make this idea not feasible.
- V. Introduction to Business of the Day
- VI. Breakout session by Division
- VII. New Business
 - a. No new business.
- VIII. Business of the Day
 - a. Resolution 7: Dependable and Inclusive Supply of Pharmaceutical and Essential Non-Prescription Supplies
 - i. K. Cram introduced the Resolution.
 - ii. Quorum was not met.
 - b. Big Red Barn Furniture Discussion

Cornell University
Graduate and Professional
Student Assembly

- i. K. Cram stated a prior resolution proposed at the end of the previous academic year that had not passed dedicated to allocating funds for furniture and decoration at the Big Red Barn. K. Cram noted that Jen from Big Red Barn would be coming to the next GPSA meeting to discuss.

IX. Reports of Officers and Committee Updates

- a. Executive Committee
 - i. No new updates.
- b. Operations
 - i. No new updates.
- c. Appropriations
 - i. No new updates.
- d. Communications
 - i. M. Heeney stated that the February newsletter was released. M. Heeney noted possible interest in the Diversity and International Students committee.
- e. Finance
 - i. No new updates.
- f. Student Advocacy
 - i. No new updates.
- g. Diversity and International Students
 - i. No new updates.
- h. Programming
 - i. M. Matthews stated that a graduate student gala would begin promoting soon.
- i. Faculty Awards
 - i. No new updates.
- j. General Committee
 - i. No new updates.
- k. Graduate School
 - i. Dean Boor stated that drop-in coffee hours had begun for students to engage with.

X. Open Forum

Cornell University
Graduate and Professional
Student Assembly

XI. Adjournment

- a. The meeting was adjourned at 6:30pm.

Respectfully Submitted,
Jennifer J. Zhang
Clerk of the Assembly

Resolution 7: Dependable and Inclusive Supply of Pharmaceutical and Essential Non-Prescription Supplies

Abstract: This resolution supports the creation of a pilot program through Cornell Health’s pharmacy for multi-unit vending machines carrying essential no-prescription medicine including emergency contraceptive to increase health accessibility and health equity on campus.

Sponsored by: Kate Carter-Cram, Michelle Heeney, Josh Washington, Planned Parenthood Generation Action at Cornell, et al.

Reviewed by: Executive Committee, 02/09/2023

Whereas, Cornell University has long been a pioneer in advancing women’s educational opportunities, admitting its first female student in 1870, a mere five years after the University’s founding and nearly a century before some of our Ivy League peers like Dartmouth, Yale, and Columbia;

Whereas, Cornell University has also historically been a trailblazer in the study of women’s issues and gender justice, celebrating the 50th anniversary of its Feminist, Gender, and Sexuality Studies department last academic year and proudly being the first school in the Ivy League to establish such a program;

Whereas, with the US Supreme Court’s decision in *Dobbs v. Jackson’s Women’s Health Organization* last year, reproductive rights and reproductive health access have been placed in greater jeopardy nationwide, with many Cornell community members feeling that the need for safe and secure access to contraceptives has increased;

Whereas, unplanned and unexpected pregnancy can place a significant burden on students’ lives, and the National Campaign to Prevent Teen and Unplanned Pregnancy published a study finding as high as 61 percent of pregnant female students dropped out of their academic program¹;

Whereas, given the recent legislative action and judicial rulings throughout the United States, this moment necessitates bold and decisive action to preserve reproductive health access at all levels, in all communities, for all people, without shame, danger, fear, or inequities;

Student Assembly

29 **Whereas**, equal access to essential healthcare products and services, such as over-the-counter
30 medicines (non-prescription), is a fundamental right of all students regardless of circumstance,
31 identity, or physical location;

32 **Whereas**, Cornell Health has served as a beacon in an otherwise isolated region for students to
33 be treated for various concerns regardless of socioeconomic status, gender identity, expression,
34 race, and other demographic factors;

35 **Whereas**, many residents of the Cornell community live far from the Cornell Health pharmacy
36 on Ho Plaza, with a walk from Robert Purcell Community Center on North Campus taking
37 approximately 20 minutes both ways and a walk from the Vet School on East Campus taking
38 approximately 25 minutes both ways²;

39 **Whereas**, the Cornell Health pharmacy operates under 50 hours a week, limited to only common
40 business hours six days a week³;

41 **Whereas**, the medical needs of our community members do not cease with the conclusion of the
42 business day;

43 **Whereas**, the nearest retailers to Cornell's campus for Plan B One-Step (name brand) are CVS
44 Pharmacy, Walgreens, and Target⁴, all of which are more than a 30-minute walk away one way
45 from central campus⁵;

46 **Whereas**, over-the-counter medications, including contraceptives, frequently force students to
47 incur large purchasing costs as well as often travel costs paid in time, money, and health in order
48 to find such medication in proximity to Cornell's campus;

49 **Whereas**, Planned Parenthood Generation Action (PPGA), an undergraduate student
50 organization registered with Cornell University Campus Groups (also affiliated with Planned
51 Parenthood), conducted independent research over the last semester on interests and engagement
52 around an emergency contraceptive vending machine that would "discreetly", and "accessibly"
53 offer Plan B⁶, with all research referenced included voluntarily in Appendix A;

54 **Whereas**, PPGA's Fall 2022 research used a Qualtrics survey with over seven hundred (700)
55 voluntary respondents across the Cornell Community⁷;

56 **Whereas**, the survey conducted among Cornell University students revealed a significant need
57 for emergency contraception access on campus, with 53.3% respondents answering that they
58 have accessed emergency contraception for themselves or others in the past and an

Graduate and Professional
Student Assembly

59 overwhelming 86.8% of respondents answering that they “strongly agree” that they will need to
60 access emergency contraceptives in the future⁸;

61 **Whereas**, current access to emergency contraception on campus is limited due to pharmacy
62 operating hours, with only 16.9% of respondents accessing contraceptives through Cornell
63 Health and the majority of respondents, 45.5%, being forced to rely on off-campus pharmacies
64 that offer less affordable and potentially cost-prohibitive options⁹;

65 **Whereas**, PPGA’s survey shows a high demand for the expansion of campus-based access to
66 emergency contraception, with 66.5% of respondents feeling “very comfortable” accessing
67 contraceptives from a vending machine operated by Cornell Health¹⁰;

68 **Whereas**, this model has proven successful across other universities with Shippensburg
69 University in Pennsylvania became the first colleges in the United States to provide students with
70 equal access to contraceptives in a vending machine format in 2012¹¹;

71 **Whereas**, the Purdue University pharmacy funds and supplies a vending machine that dispenses
72 common and basic over-the-counter medications such as pain relief, fever reducers, allergy
73 relief, cold/cough/flu medicine, gastrointestinal medicine, as well as contraceptives and other
74 sexual wellness products¹²;

75 **Whereas**, peer institutions, including University of California Davis¹³, Boston University¹⁴,
76 University of Florida¹⁵, George Washington University¹⁶, Brandeis University¹⁷, and many
77 more¹⁸, have already launched similar programs in their respective campus vending machines
78 across the country, including in states with varying reproductive healthcare access;

79 **Whereas**, Ivy League peer institutes like Dartmouth¹⁹, Yale²⁰, and Columbia²¹ who once
80 followed Cornell’s leadership on issues of gender justice, all of whom were nearly a century

Cornell University
Graduate and Professional
Student Assembly

81 behind Cornell in admitting non-male students²², have now outpaced our campus on reproductive
82 healthcare access;

83 **Whereas**, Cornell has existing business relations with multiple vending machine firms with
84 operation in the Ithaca area, specifically having “nearly 300 vending machines throughout
85 campus” and “in off-campus Cornell facilities in the Ithaca area”²³;

86 **Whereas**, Cornell University installed twelve (12) Vengo vending machines in 2017 in locations
87 such as Robert Purcell Community Center and Appel Commons that possess the capabilities to
88 dispense items such as Advil and other OTC medications²⁴;

89
90 **Whereas**, Stanford University specifically employs a similar machine made by Vengo Labs that
91 provides students with twenty-four (24) access to emergency contraception and other sexual
92 wellness products²⁵;

93 **Whereas**, Cornell Health’s pharmacy already sells “Progestin-only emergency contraception
94 such as *Plan B* [generic], *Plan B One Step*, *Next Choice*, and *Levonorgestrel Tablets*... without a
95 prescription”²⁶;

96 **Whereas**, generic brand Plan B is currently offered at the Cornell Health pharmacy for only \$10
97 (ten dollars), nearly five (5) times less than the average price of \$40-\$50 for a single-dose pill of
98 many name brands of Plan B One-Step at local major pharmacies, therefore, the installation of
99 the medicine in such machines is unlikely to pose significant additional burden to the
100 institution²⁷;

101 **Whereas**, providing readily available over-the-counter medications through vending machines
102 will ensure that all students have immediate, private, and equitable access to essential healthcare
103 products regardless of schedules or commitments, reducing barriers to access for students who
104 face difficulties obtaining such medicines due to factors like limited access to transportation and
105 store hours, and ensuring that they have the autonomy to control their own healthcare decisions;

106 **Be it therefore resolved**, that the Cornell Graduate and Professional Student Assembly believes
107 it is necessary for Cornell Health to equitably expand access to over-the-counter non-prescription

Cornell University
Graduate and Professional
Student Assembly

108 drugs and emergency contraceptives that support the overall health and wellbeing of all
109 community members;

110 **Be it further resolved**, Cornell Health should follow the growing movement²⁸ of accessible
111 emergency contraceptive and other over-the-counter non-prescription drugs in twenty-four (24)
112 hour accessible vending machines that include products ranging from pain and fever relief,
113 stomach illness relief, and other relevant over-the-counter medication like our peer institutions²⁹;

114 **Be it further resolved**, the vending machines should be placed in places that are public yet still
115 discrete enough to protect the user's privacy and priced at rates that closely mirror those of the
116 in-person Cornell Health pharmacy;

117 **Be it further resolved**, Cornell Health should include relevant accompanying educational
118 material around seasonal illness health, health promotion, mental health, sexual health (including
119 but not limited to information on STD prevention, birth control, reproductive health and the
120 subsequent available resources on reproductive right both inside Cornell Health and around the
121 Ithaca area) with vending machines to support campus wide health promotion;

122 **Be it further resolved**, the co-signed hope that the Cornell University Assemblies and Shared
123 Governance system, in accordance with their receptive chartered responsibilities as entrusted by
124 the Cornell community, Board of Trustees, and University President will be able to stay in an
125 advisory and community based accountability role to continue to support Cornell Health and the
126 Cornell Health pharmacy in overseeing this major university policy initiative and supporting the
127 Cornell community's wellbeing on this issue of health access, health equity, reproductive rights,
128 and reproductive health;

129 **Be it finally resolved**, that Cornell Health and the Cornell Central Administration recognize the
130 hard work organizing and advocating for this issue by Planned Parenthood Generation Action
131 (PPGA) and other student organizations stakeholders through this pilot program, ensuring that
132 emergency contraceptive and other reproductive rights educational material are always included;
